

### ALL-TOOL

#### ADAPTIVE TOOL

High gravity on Tropsili 6 created a need for lightweight construction tools and materials. The AllTool was a popular necessity for colonists due to its all-in-one nature, cutting down on the amount of tools and weight that needed to be carried between job sites. The AllTool is made of a transitive metalloid that can change its shape depending on the electric current passed through it. This allows the tool to take the form of a variety of basic tools needed for construction and maintenance.

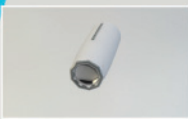

### CRAFTSMAN

### GODSPICE

#### PRESERVATIVE/SCHEDULE 1 DRUG

A byproduct of the stem cell research era, Godspice was initially created as a food preservative. Tiny, harmless microorganisms were spread onto perishable foods where they would reanimate decaying foods. Once ready to eat, a simple cleansing removed the organisms and rendered it safe to consume. However, GodSpice soon became illegal under section H.R.2433 of the Human Advancement Act as many began ingesting it in large quantities because it was discovered to prolong a person's life. The "spice" can still be obtained through various black markets on unregulated trade worlds.

### SNOW DIFFUSER

#### SNOW MELTER

The pervasive amount of snow and ice makes travel a constant difficulty. Special snow diffusers were created to help colonists move between established paths and the unmaintained outposts. The Stihl Snow Diffuser projects a high-intensity laser grid that melts ice and snow instantly as the colonist moves forward.

### HELPER CLUSTER 6D

#### NANO HELPER BOTS

Though initially created for military purposes, nano-bots eventually became available for civilian use. Slight modifications changed the bots from micro-weaponry to useful assistants for the colonies on Tropsili 6. Once activated, these small clusters, or swarms, aid in construction, first aid, communication, and even self-defense. Due to the constant threat of deadly hail, the Tripoli 6 models feature a shield modification that allows the bots to create a rapid energy shelter when linked together.
